Fixing Broken Windows

"If a factory or office window is broken, passersby observing it will conclude that no one cares or no one is in charge. In time, a few will begin throwing rocks to break more windows. Soon all the windows will be broken, and now passersby will think that, not only is no one in charge of the building, no one is charge of the street on which it faces."

James Wilson and George Kelling, Atlantic Monthly 1982
