

What is your vision for the IAAI Foundation for the next five years?

In working with the Foundation in an advisory role, I have experienced the need for securing funding sources to move the vision for greater training and education. The current state of our profession requires greater attention to the scientific aspects of the discipline as we expand the boundaries of Scientific Methodologies in our advanced technological world. The role and action of the Foundation will be necessary to provide funding sources from all avenues of commerce and education in order to meet this demand. I am committed to working hard to help achieve this goal.

What positions have you held in your local Chapter?

I am currently a member of the Board of Directors for the California Conference of Arson Investigators (Chapter 22). I sit on the Training Committee as well as our CFI Committee. I am the incoming Chairman of the CFI Committee in February 2019.

What positions have you held in IAAI?

I have not held any positions with IAAI
